SL-GSCC

Air Compressor Cleaner Concentrate

SL-GSCC consists of premium, fast-acting concentrate cleaners. It is designed to be added to compressor lubricants to remove carbon, varnish and other hydrocarbon-related deposits.

SL-GSCC is recommended for use at a ratio of 1 part concentrate to 10 parts lubricant.

Instructions:

1. Drain a volume of lubricant equal to the volume of cleaner being added
2. Add cleaner to sump
3. Operate compressor between 24-48 hours
4. Drain lubricant-cleaner mixture while the compressor is still hot
6. Replace oil filter and fill compressor with the recommended Isel lubricant
6. After first 30 minutes of use, take an oil sample

ATTRIBUTES

- Outstanding carbon and varnish removal
- Fast-acting
- Non-toxic/non-hazardous

TYPICAL LUBRICANT PROPERTIES

SL-GSCC Viscosities	15
Viscosity cSt @ 40°C	15
Viscosity cSt @ 100°C	2.9
Flash Point °F (°C)	180 (82)
